

DIGITAL HUMAN LIBRARY

Bring the field trip experience into your classroom!

Today, video conferencing has become a tool to enhance and enrich curriculum; link schools with the outside world and current events; develop knowledge of different cultures and global areas; and create community awareness on a provincial, national, and international scale.

Students interact through questions and learn a great deal from this real-time communication with experts.

With video conferencing, the classroom has become geographically limitless. No longer do students have to feel confined to their rooms, schools, or even to their countries.

K-12 classrooms that use video conferencing has increased student efficiency and productivity by ...
